PROFESSIONAL SUMMARY

Results-driven software engineer with a strong foundation in competitive programming, system design, and hands-on experience in building scalable, high-performance web applications. Skilled in crafting clean, performant interfaces and reliable, efficient backend architectures, with a passion for open-source contributions and driving engineering impact through data-driven insights.

EDUCATION

Newton School of Technology, Rishihood University

Bachelor of Technology (Artificial intelligence) *2024 - 2028*

- Grade: 6.8/10.0

Rose Petal Higher Secondary School

Intermediate (Class XII) *2023 - 2024*

- Grade: 55.2%

Geetanjali Public School

Matriculation (Class X) *2021 - 2022*

- Grade: 65.2%

WORK EXPERIENCE

Countrees AI Remote

Front-End Developer *May 2025 - July 2025*

- Developed and designed the Inventory Management module of an ERP system using React.js and Figma, enhancing scalability and performance in a 6-member agile team through optimized UI workflows and modular architecture.
- Utilized expertise in system design and architecture to optimize UI workflows and modular architecture, resulting in improved scalability and performance.

PROJECTS

Cally — Meeting Scheduler **November 2025**

- Built a customizable, high-performance scheduling system featuring personalized dashboards and shareable booking links, enabling flexible user control while aligning with modern SaaS booking and self-service platform trends.
- Utilized expertise in system design and architecture to create a cleaner, more structured full-stack system, resulting in improved scalability and performance.

Haven — Dating App **August 2025**

- Developed a controlled, identity-verified campus matchmaking system differentiated from generic platforms by restricting access to verified students, while leading marketing on Instagram that generated 17,000+ views in a month.
- Utilized expertise in system design and architecture to resolve authentication flow complexities, swipe-matching state management issues, and database relationship handling, resulting in secure, seamless user interactions.

SKILLS

Programming Languages: Python, TypeScript, JavaScript, SQL

Frameworks and Tools: React.js, Express.js, Next.js, Prisma ORM, PostgreSQL, Figma, Tailwind CSS, Vercel

Data Tools: PostgreSQL, NumPy

Software Packages: Pandas, Node.js, Bootstrap, MySQL, MongoDB

Additional Courses: Data Structure

Others: Git and Github, Postman, UI/UX, Framer Motion, OAuth 2.0

EXTRA-CURRICULAR ACTIVITIES

- Freelance Developer and Creative Designer: Collaborate in a 3-member team delivering end-to-end web development, graphic design, and video editing solutions for diverse client projects across multiple industries.
